PRODUCT SKU: 6227

Why Choose GlobalCare SP7 Toilet Bowl Dispenser?

Skip the unpleasant task of cleaning your toilet with the GlobalCare SP7 Toilet Bowl Dispenser. This septic-system friendly toilet bowl cleaner attaches to your toilet bowl and keeps it clean automatically. The system installs easily and out-of-sight for a streamlined appearance, and it is compatible with eco-friendly cleaning agents. The toilet bowl cleaner makes toilet maintenance simple, and it saves money compared to tank tablets. When used with GlobalCare degraders and odor controllers, the cleaning system reduces bad bathroom smells, prevents clogs and even promotes a healthier septic system.

Put away your toilet brushes and rubber gloves. Simply attach the automatic toilet cleaner to your toilet bowl, fill the easy-to-use dispenser, and let your toilet clean itself. This toilet cleaning system not only saves you time but also reduces odors that build up between bowl cleanings. For best results, use the system with compatible cleaning products from GlobalCare. The company's trademarked line specializes in safe, eco-friendly products that reduce odors and keep drain lines clear while employing active enzymes and good bacteria to improve the efficiency of septic tanks.
