Why Choose PetHealth Medicated Shampoo?

Keep your dog comfortable and itch-free with the vegetable-based, preservative-free PetHealth Medicated Shampoo. This medicated shampoo for dogs is optimal for your precious pet's skin health and is also phosphate, sulfate, alcohol and paraben free. Pets are exposed to environmental irritants daily, and this sensitive skin dog shampoo helps to cleanse, moisturize and soothe, while maintaining the natural lipid barrier of your pet's skin. This shampoo helps to calm and soothe itchy and irritated patches of skin, and the formula is safe to use on puppies.

PetHealth shampoo also has anti-bacterial and anti-fungal functions to maintain skin health. The panthenol in this anti-itch shampoo for dogs helps the skin maintain its natural moisture balance. The shampoo also contains menthol, camphor and peppermint oil, which leave your pet with a mint-fresh scent. Odor neutralizers in this product eliminate pet odors and have a long-lasting effect.
