C6498 | ANTI-STRESS KIT INCLUDES ISOTONIX
ADVANCED B-COMPLEX (30 SERVINGS) AND
TLS ACTS ADRENAL; CORTISOL; THYROID &
STRESS SUPPORT FORMULA (30 SERVINGS)

Why choose the Anti-Stress Kit?

The Anti-Stress Kit includes two products that work synergistically to promote relaxation, while giving you the energy you need to make it through each day. In addition, the Anti-Stress Kit offers savings.

Isotonix Advanced B-Complex helps the body to metabolize proteins, fats and carbohydrates to enhance energy production. Isotonix Advanced B-Complex delivers all of the B vitamins, along with select minerals and electrolytes to help boost energy, decrease stress, improve mood, and much more. It contains pantothenic acid (B5) which promotes proper neurotransmitter activity in the brain is also known as the anti-stress vitamin because it detoxifies brain tissue, helps relieve physical and emotional stress, and promotes the secretion of hormones essential for optimal health. It also contains magnesium which helps slow the aging process by combating oxidative stress. Magnesium is required for releasing energy from food during metabolism, regulation of body temperature, proper nerve function and helping the body handle stress.

The second product in the kit is TLS ACTS Adrenal, Cortisol, Thyroid & Stress Support. Even in seemingly good times, stress is something we cannot escape; not only does it have a harmful effect on us mentally, but it can also wreak havoc on us physically – including in our waistlines. When we are faced with stress, our bodies go into “fight or flight” response and certain hormones are released by the adrenal gland, hormones that would give the body a burst of energy and strength.

TLS ACTS Adrenal, Cortisol, Thyroid & Stress Support Formula, specially formulated with holy basil and ashwagandha, works specifically to promote healthy thyroid function to help control stress levels.

These products complement each other, equipping you with extra energy, helping you with weight management, and addressing the real issue behind why most people gain weight — stress. These supplements taken in conjunction with a healthy lifestyle including regular exercise and nutritious eating can boost your energy, motivation, as well as promote healthy physiological functions to help you feel your best, inside and out!
