

TLS® THERMOCHROME WITH GREEN COFFEE BEAN EXTRACT

SUPPORTS THERMOGENESIS
AND LIPOLYSIS

MAY HELP INCREASE ENERGY

MAY HELP SUPPRESS APPETITE

PRODUCT CODE: HK6406 | 60 SERVINGS

Why choose TLS Thermochrome with Green Coffee Bean Extract?

There are many supplements on the market that claim to be using high quality ingredients. Typically, when you restrict calories/intake, your body stops working as hard, and your metabolism slows down. TLS Thermochrome with Green Coffee Bean Extract allows you to restrict calories, while help maintaining your metabolism and increase the burning of body fat for fuel.

TLS Thermochrome with Green Coffee Bean Extract stimulates thermogenesis.

Thermogenesis is the production of heat generated from the burning of consumed and stored fat. TLS Thermochrome with Green Coffee Bean Extract is a unique, proprietary formula that combines the proven sciences of thermogenics and the support of metabolic functions.

TLS Thermochrome with Green Coffee Bean Extract promotes weight loss by helping your body burn fat while preserving healthy, lean muscle mass.

What is Svetol green coffee bean Extract?

Svetol is a decaffeinated extract of green coffee bean. It has been researched to support weight and body fat management through unique mechanisms. Svetol is obtained from unroasted coffee beans of the Robusta variety and possesses a unique composition of chlorogenic acids, which are responsible for its effectiveness. The mechanism by which it works involves the inhibition of glucose-6-phosphatase, an important enzyme for producing glucose. Svetol may also help to reduce carbohydrate absorption and may contribute to weight loss by promoting the use of fat as a source of energy. In other words, when the body does not have readily accessible glucose to use for energy, it then has to burn the stored fat for energy. Svetol's extraction procedure and its unique mechanism of action set this ingredient apart from other green coffee beans on the market.

If I am sensitive to caffeine can I take this?

Yes. You can still take this product if you are sensitive to caffeine. You may not be able to take more than a half serving until your body gets accustomed to the product. You can also take a half serving just once a day if you need to cut back on the caffeine more dramatically.
