Why Choose Curcumin Extreme with BCM-95?

Curcumin Extreme separates itself from the other curcumin products on the market due to its superior bioavailability and absorption. Curcumin Extreme contains BCM-95® along with broccoli seed extract, a powerful source of sulphoraphane glucosinolates, which delivers significantly more bioactive curcumin into the blood than other curcumin sources. The addition of broccoli seed extract also supports normal detoxification activity along with the curcumin. This delivery system allows for a variety of health benefits including supporting overall liver health and free radical protection.

What are the potential advantages of taking curcumin?

Curcumin supports liver detoxification activity, promotes normal cellular regeneration and helps maintain healthy glutathione levels. It also supports the body's natural ability to produce detoxification enzymes and has been shown to be a powerful antioxidant. It promotes neurological health and helps to maintain neurological health as we age. It can also promote free radical protection and a strong immune system.

Who should take Curcumin Extreme?

Anyone 18 or over can take Curcumin Extreme, especially those who want to support their normal liver detoxification activity, help maintain their healthy glutathione levels, promote their neurological health and those who want to promote a strong immune system.

When should I start to see/feel the effects of this product? What should I expect?

The antioxidant benefits of curcumin should be noticeable in about four to six weeks. Please remember that everyone's body is different, so for some it may take longer to notice the benefits of curcumin. You should expect to feel better and healthier overall.
