ANTI-AGING NUTRACEUTICALS

HELPS PROMOTE HEALTHY
AGING

PROMOTES HEALTHY
METABOLISM OF GLUCOSE

SUPPORTS A HEALTHY
ENDOCRINE SYSTEM

PRODUCT SKU: 13113 | 30 SERVINGS

Why Choose Prime AGE Defense Formula?

When excess sugar is consumed, it can bond with protein in a process called glycation, resulting in the formation of advanced glycation end products (AGEs), which can cause problems such as premature wrinkles and organs that don't operate as efficiently as they could.

Most competitors' products only help to reduce the formation of advanced glycation end products, but do not work to support your body's normal ability to remove AGEs through healthy circulation. Prime AGE Defense Formula offers complete support by reducing the formation of AGEs and supporting the body's ability to remove AGEs.

The blend of ingredients in Prime AGE Defense Formula supports numerous areas of health associated with aging, including skin health, circulation, cell function, arterial health, DNA and RNA.

Prime AGE Defense Formula is one of the must-have healthy aging products in the Prime anti-aging supplement lineup to help you feel healthy and vibrant as you age.

Where do AGEs come from?

AGEs are present in foods, especially foods cooked at high temperatures and browned, such as foods that are grilled, broiled or fried. Cooking at lower temperatures (poaching, boiling) can reduce the presence of AGEs in foods. Cigarette smoke (as well as smoke from other tobacco products) also produces a vast amount of AGEs. Finally, AGEs can be produced in the body when free glucose binds to protein.

What can I do naturally to reduce my exposure to AGEs?

To reduce your consumption and production of AGEs, minimize intake of browned proteins such as grilled, fried or broiled meats, stop smoking and avoid exposure to cigarette/cigar/pipe smoke.
