MAINTAIN BONE HEALTH

CARDIOVASCULAR HEALTH

PRODUCT SKU: 13071 | 30 SERVINGS

## Why Choose Isotonix Vitamin D with K2?

Makers of bone health supplements boast about the amount of vitamin D in their products. But only Isotonix delivers a bone health supplement that contains vitamin D with K2 - making it the best supplement to help maintain your bone health.

Despite the fact that there are many vitamin D supplements to choose from, Isotonix Vitamin D with K2 proves that all supplements are not created equal. By being the first of its kind to combine vitamin D with vitamin K2 in an isotonic form, this product supports vascular health and calcium utilization. By enhancing vitamin D's role in bone health, heart health and immune support, the addition of vitamin K also helps to support normal calcium absorption and the promotion of healthy arteries.

## Why is vitamin K included in Isotonix® Vitamin D with K2?

Vitamin K is included in this product because of its unique partnership with vitamin D. Vitamins K and D work together to promote healthy calcium absorption and utilization. Vitamin K supports the delivery of calcium to the bones and helps maintain arterial health.\*

## What are dietary sources of vitamin D?

Foods rich in vitamin D include cod liver oil, salmon, mackerel and tuna.
