PRODUCT SKU: 13847 | 30 DAY SUPPLY

Why Choose Heart Health System?

The Heart Health System is comprised of three advanced formulas - Heart Health Essential Omega III Fish Oil with Vitamin E, Triactive, and Heart Health Advanced LipiTrim Ultra - specifically formulated to create an all-inclusive kit that addresses the main areas of heart health: cholesterol, homocysteine and C-reactive protein. The Heart Health System sets itself apart from the competition by providing a comprehensive, multifaceted approach to cardiovascular health with easy-to-use, pre-measured packets to eliminate the guess work of supplementation. When taken as directed, the three product work together to provide measurable results and proactive lifetime maintenance.

What exactly is cardiovascular health?

The term cardiovascular health (also referred to as heart health) is used to describe a cardiovascular system that is strong and in good physical condition. By leading a more healthful lifestyle and through proper supplementation, you can significantly increase your chances of maintaining good cardiovascular health.

Each Packet Contains	Area of Heart Health Targeted
TriActive	Provides vitamins, mineral and herbs proven to help maintain heart muscle strength. TriActive targets three major areas, the arteries, cholesterol and, homocysteine levels to promote the healthy performance of the body's cardiovascular system.
Advanced® LipiTrim Ultra*	Composed of Sytrinol, a patented proprietary formula designed to promote overall cardiovascular health. Advanced LipiTrim Ultra is a powerful antioxidant that promotes healthy levels of total cholesterol, LDL cholesterol and triglyceride levels, and promotes the normal synthesis of triglycerides in the liver.
Heart Health™ Essential Omega III Fish Oil with Vitamin E	This fish oil contains EPA (eicosapentaenoic acid) and DHA (docosahexaenoic acid), which help maintain healthy triglyceride levels and promote normal blood flow. Essential Omega III provides three grams of EPA and DHA, the most effective amount to promote overall cardiovascular health.
