TARGETS STUBBORN BELLY FAT

ENHANCES LEAN BODY MASS

CLA CONTAINS NATURAL INGREDIENTS THAT CAN REDISTRIBUTE FAT TO FAT-BURNING MUSCLE TISSUE

6428 - 60 SERVINGS

Why Choose TLS Tonalin CLA?

If you're looking to reduce overall body fat - including that stubborn belly fat - and preserve lean muscle, try TLS Tonalin CLA for weight loss success. Other CLA supplements may include lesser forms and amounts of conjugated linoleic acid, but TLS Tonalin CLA uses the best of this ingredient in its clinically-studied quantity.

Key Ingredients:

Tonalin® CLA (100% Pure Safflower Oil): Tonalin CLA is a safe, scientifically proven, effective nutritional supplement that contains no stimulants of any kind. Tonalin CLA works in several ways: First, it may help increase and maintain lean muscle, which naturally may slim your body. Secondly, Tonalin CLA helps to decrease the amount of fat stored in your body. The result is, as you diet, you may drop a clothing size or two without the dreaded yo-yo effect of losing and regaining weight. Why? Because you are reducing body fat, not water, which is a more permanent and healthy way to lose weight. Thirdly, research shows CLA may promote overall well-being in other areas that are currently being studied worldwide. For best results, exercise moderately.

Chromium: Chromium is a trace mineral that assists with burning carbohydrates and fat. It helps provide blood sugar to cells and may support normal sensitivity to insulin, potentially helping to curb cravings for sweets and carbohydrates. Because of the role it plays in the metabolism, chromium is commonly added to natural weight loss products.

Product	CLA per day	Tonalin® CLA?
