FORMULA

HELPS CONTROL ODORS

ENZYMES BREAK DOWN
ORGANIC SEWAGE

PRODUCT SKU: 6521 | 32 OZ.

Why Choose GlobalCare™ SP7™ All-Purpose Degradable & Odor Controller?
GlobalCare™ SP7™ All-Purpose Degradable & Odor Controller contains safe, living bacteria, which are completely harmless and non-toxic. The combination of the two ingredients allows SP7 to do what no other waste control product of its kind can do. Organic wastes are things like cooking grease, body oils that come off in the shower and sewage from bathrooms and boat bilges. SP7 makes it easy to biodegrade these kinds of unpleasant wastes, preventing and solving all kinds of difficult and sometimes costly problems.

SP7 is meant to tackle tough problems not only at home but those related to organic waste from hospitals, hotels, nursing homes, restaurants, supermarkets, food processing plants, sewage plants, farms, recreational vehicle and marine holding tanks and port-a-toilets. The customer base for SP7 is enormous.
