CONCENTRATED CLEANER,
SANITIZER, FUNGICIDE,
VIRUCIDE AND MILDEWST AT

PRODUCT SKU: 6213, 6213IBVR | 32 FL. OZ.

Why Choose Snap II Cleaner Disinfectant?

Clean, deodorize and disinfect a variety of surfaces with Snap Disinfectant Cleaner. This phosphate-free cleaner is designed for use in food service establishments, hotels and motels, nursing homes, hospitals and more. It is an EPA-registered product and helpful in preventing cross-contamination in both commercial facilities and homes. Since this disinfectant cleaner is a concentrated solution, one bottle replaces up to 32 bottles of typical anti-bacterial cleaners, saving you money. Snap Disinfectant Cleaner is also a fungicide, virucide and mildew fighter.

Use Snap Disinfectant Cleaner in your bathroom, kitchen, athletic center or anywhere else where germs often accumulate. The formula is biodegradable and phosphate-free. Before using this natural disinfectant cleaner, dilute it to the proper concentration. To clean hard, non-porous surfaces, mix 2 ounces of Snap with 1 gallon of water. This disinfectant also removes mildew and is effective against many organisms, including E. coli, Strep. faecalis and Staph aureus. When you clean with Snap, you deodorize and disinfect at the same time.
