## Isotonix®

The world's most advanced nutraceuticals

MAINTAIN HEALTHY JOINT  
FLUIDITY AND FLEXIBILITY

PROMOTES JOINT HEALTH

MAINTAIN JOINT COMFORT

PRODUCT SKU: 13081 | 45 SERVINGS

### Why Choose Prime™ Joint Support Formula by Isotonix®?

As the body ages, many people experience joint discomfort. One way of dealing with this is to take a supplement that supports bone and joint health. The majority of joint support products on the market contain three main ingredients: glucosamine, chondroitin and MSM (methylsulfonylmethane). The research on both chondroitin and MSM is very controversial. Chondroitin, for instance, has very poor absorption due to its high molecular weight. Research on MSM is not conclusive and it takes extremely large quantities of MSM daily (2-6 grams) to make a difference and see results.

Like many products, Prime Joint Support Formula by Isotonix reaps the benefits of glucosamine, but what sets it apart is the combination of glucosamine with the powerful antioxidant Pycnogenol® and Hyaluronic Acid. Prime Joint Support Formula by Isotonix combines three scientifically-proven ingredients into one product to support joint health and comfort:

- 1) Glucosamine - Supports healthy joint function and promotes the normal production of synovial fluid, which lubricates your joints and regenerates cartilage
- 2) Pycnogenol® - Inhibits the body's over active inflammatory processes associated with the normal aging process
- 3) Hyaluronic Acid - Helps maintain strong, healthy cartilage and promotes normal healing

How often should I take Prime Joint Support Formula by Isotonix?  
This product is most effective when taken daily.

### The Isotonix Advantage

Isotonix products are formulated to deliver nutrients to the body at the optimal rate for maximum absorption. Isotonix powders, when mixed with water, are buffered and isotonic; meaning they are a perfect match to your body's chemistry.
