PRESCRIPTION OXYGEN EXTREME (30
SERVINGS) AND NUTRICLEAN HEPATOCLEANSE
(30 SERVINGS)

Why Choose the Complete Detoxification Kit?

Toxins build up in our bodies over time through the air we breathe, the foods we eat and the stress we put our bodies under on a daily basis. The master filter in our body – the liver – works to cleanse the body of these toxins to keep them from disrupting the normal functions and operations of the body; essentially, keeping you healthy. Unfortunately, the overabundance of toxins our bodies build up, causes undue stress on our liver; and often the liver can't keep up with the demand. It needs help to remove these toxins and keep you healthy. To promote regular detoxification, we've created the Complete Detoxification Kit, a combination of three products – Timeless Prescription® Oxygen Extreme™, Curcumin Extreme™, and NutriClean® HepatoCleanse – that work synergistically to support overall liver health, promote normal cleansing and detoxification of the liver, and provide antioxidant support to keep your body – including the liver – healthy over time

Who should purchase the Complete Detoxification Kit?

Anyone over 18 years old or over can take the products contained in the Complete Detoxification Kit, especially those who want to support normal liver detoxification activity, help maintain healthy glutathione levels and provide the body with strong antioxidant protection to fight the negative effects of free radicals.

What's the difference between a liver detox and a weight loss detox?

A weight loss detox, which is recommended once or twice a year, usually lasts for periods between three and seven days and involves eating only certain foods, in addition to using products such as NutriClean® 7-Day Cleaning System. The Complete Detoxification Kit is meant to be used to support the body's normal detoxification process and does not require the types of restrictions common with a periodic detox system. This includes scavenging free radicals on an ongoing basis to rid the body of toxins that build up, providing a strong, lasting antioxidant defense to keep toxins from accumulating, and maintaining your liver health, which helps cleanse the body on a regular basis and not just for a short period of time.

Save money by purchasing the Complete Detoxification Kit instead of buying these products individually.
