Why Choose Autoworks Shimmering Polish?

Harsh weather, road construction and flying debris can all have an effect on the shine and lustre of your car's finish. Your car's finish is being constantly bombarded by the elements everyday, which eventually take a toll on your car's paint if the finish is not washed and waxed on a regular basis. Forgetting to take care of your car's finish with routine maintenance could eventually cost you a lot of money. A quality repaint job could easily cost upwards of \$4,000. Some detailing sprays can leave streaks or a white residue on your car's finish. Autoworks High Performance Auto Care Shimmering Polish gives your car's finish a brilliant, long lasting, streak-free shine without any white residue. The optical brighteners maximize the paint's brilliance and reflection. Autoworks High Performance Auto care Shimmering Spray repels water and resists detergents, pollution, hard water spotting, road salts, insects and bird droppings, leaving a slick, high-gloss shimmer to your car's finish. Autoworks High Performance Auto Care Shimmering polish is an environmentally-friendly detailing solution with non-toxic, biodegradable ingredients that are free of paraben preservatives and phosphates. Turn heads with Autoworks High Performance Auto Care Shimmering Polish, for a showroom shine!
