BENEFITS

FAQ'S

BENEFITS

- Firm, long-lasting hold
- Dries quickly and invisibly
- Gentle on the eye lid
- Includes five tubes of adhesive, each with re-sealable caps
- Purse-friendly for travel convenience

FAQ'S

How do I use Motives Lash Adhesive?

- Apply Motives Lash Adhesive to the base of the false eyelashes while holding lashes with tweezers
- Allow adhesive to dry for 30 seconds before applying the false lashes to lash line
- With either tweezers or the end of a brush, push false lashes into lash line all the way from corner to corner
- Take tweezers and gently squeeze false lashes and your lashes together
- To ensure proper flow, clean hardened adhesive from the tip of the tube

Can I use each tube multiple times?

Yes, each tube contains enough adhesive for at least two applications as long as the cap is replaced properly to prevent product from drying out.

What should I do if I get Motives Lash Adhesive in my eye?

Although Motives Lash Adhesive is gentle on the eyelid, you should avoid direct contact in the eye. Should contact occur, rinse thoroughly with water. If I have sensitive skin, will this cause my eyelid to become irritated? Our formula provides a firm, long-lasting hold while being gentle on the eye. If you do experience any irritation, we recommend you discontinue use of this product.
