

# CURCUMIN EXTREME™

## CURCUMIN EXTREME™

HELPS PROMOTE NORMAL  
CELL CYCLE ACTIVITY

SUPPORTS NORMAL LIVER  
DETOXIFICATION ACTIVITY

HELPS MAINTAIN HEALTHY  
GLUTATHIONE LEVELS

PRODUCT CODE: SG13145 | 30 SERVINGS

### Why choose Curcumin Extreme?

There are many curcumin products on the market but Curcumin Extreme with BCM-95™<sup>Ø</sup> has superior bioavailability and absorption than most. Curcumin Extreme helps to maintain healthy glutathione levels, promotes normal cell cycle activity and supports normal liver detoxification. Curcumin Extreme also includes broccoli seed extract, a powerful source of sulforaphane glucosinolates. Sulforaphanes support the normal production of Phase II liver detoxification enzymes including glutathione synthase, heme-oxygenase and catalase. Glutathione is the master antioxidant in the human body which serves to preserve and protect the brain and other body tissues by protecting them from the damage of free radicals. Furthermore, glutathione recycles vitamins C and E which are also powerful antioxidants.

### Does Curcumin Extreme contain pork or pork products?

Yes, the capsule used for this product is sourced from pig.

### Key Ingredients

#### Curcumin (BCM-95)

Until now, curcumin has been known to have poor bioavailability, requiring high doses to promote health. BCM-95 delivers significantly more bioactive curcumin into the blood than to many other curcumin sources. Curcumin supports the normal production of liver detoxification enzymes, including glutathione synthase as well as other detoxification enzymes such as heme-oxygenase and catalase. Curcumin has also been shown to promote normal hepatic tissue repair.

#### Broccoli Seed Extract

Broccoli Seed Extract is a potent source of sulforaphane glucosinolates. Sulforaphanes support the normal production of liver detoxification enzymes including glutathione synthase. Sulforaphanes promote the body's natural enzyme antioxidant defense systems and function as a powerful indirect antioxidant. Sulforaphanes work to support the body's natural defense systems and maintain elevated levels of glutathione. Glutathione is the master antioxidant of the body. It is an important molecule that acts as a powerful antioxidant to protect the brain and other body tissues from free radicals. It also acts to recycle vitamin C and E which also neutralise free radicals.
