SUPPORTS CARDIOVASCULAR HEALTH

PRODUCT CODE: SG13057 & SG13057IBV | 90 SERVINGS

Why choose Isotonix Advanced B-Complex?

Isotonix Advanced B-Complex is an isotonic-capable combination of the essential B vitamins with magnesium and potassium to support health. Isotonix Advanced B-Complex provides the vitamins B-12, B2 (riboflavin), B6, folic acid, vitamins B3 (niacin), B5, B1 and biotin.

Why are B vitamins important in the ageing process?

The ability to absorb B-vitamins might decrease with age. The elderly in general suffer from a reduction in sense of taste and, thus, appetite and may use many acid reducing medicines that may cause them to have not enough Vitamin B.

Does Isotonix Advanced B-Complex contain pork or pork products?

No.

Ingredients

Vitamin B12

Vitamin B12, is found in organ meats, liver, beef, pork, eggs, whole milk, cheese, whole wheat bread and fish. Small amounts can also be derived from the fermented soy products miso and tempeh. Individuals who wish to supplement their diet can consider consuming a vitamin B12 supplement to maintain optimal health. Vitamin B12 supports energy metabolism and red blood cell formation.

Vitamin B2

Vitamin B2 is found in liver, dairy products, dark green vegetables and some types of seafood. Vitamin B2 serves as a co-enzyme, working with other B vitamins. It supports healthy red blood cell and plays a role in turning food into energy. Vitamin B2 is water-soluble and must be replenished daily.
