MAY HELP TO MAINTAIN
NORMAL CHOLESTEROL
LEVELS

HELPS TO MAINTAIN
HEALTHY BLOOD PRESSURE
LEVELS

HELPS TO MAINTAIN
NORMAL BLOOD FLOW

PRODUCT CODE: SG13852 & SG13852IBV |
60 SERVINGS

Why Choose Heart Health Essential Omega III with Vitamin E?

Heart Health Essential Omega III with Vitamin E is a superior product due to a number of factors. The best fish are used to produce a clean and safe product that is rich in eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA). It contains 3000 mg of fish oil where many other commercial products contain less. Heart Health Essential Omega III Fish Oil with Vitamin E comes from small fish where other competitive products use large fish which are more likely to accumulate toxins. Heart Health Essential Omega III Fish Oil with Vitamin E provides a high quality, high purity product with significant percentages of the health promoting EPA and DHA.

Is the fish oil tested to be free of heavy metals?

Yes. The fish oil used in Heart Health Essential Omega III Fish Oil with Vitamin E is tested twice, once from the manufacturer and then by an independent testing company. The fish oil used in Heart Health Essential Omega III Fish Oil with Vitamin E is laboratory tested for mercury, lead, PCB, and other heavy metals.

Does Heart Health Essential Omega III Fish Oil with Vitamin E contain pork or pork products?

No.

Key Ingredients

Fish Body Oils

Fish oils or marine oils, are lipids (fats) found in fish. Fish oils are rich sources of omega-3 long-chain polyunsaturated fatty acids. EPA (eicosapentaenoic acid) and DHA (docosahexaenoic acid) are the two most studied fish oils. EPA and DHA help maintain normal triglyceride levels by promoting normal lipogenesis and supporting normal fatty acid oxidation in the liver. EPA and DHA promote the normal transcription of genes coding for lipogenesis enzymes and promote the normal transportation of the regulatory enzymes of fatty acid oxidation.

Vitamin E

Vitamin E is one of the most powerful fat-soluble antioxidants in the body. Vitamin E is commonly added to fish oil supplements to provide antioxidant protection of DHA and EPA.
