- Conveniently packaged with two masques for monthly treatment

FAQ'S

How do I use Lumière de Vie Moisture Intense Sheet Masque?

After cleansing and toning the face and neck, remove the Moisture Intense Sheet Masque from its sealed packet and peel the protective film from both sides. Apply directly and evenly onto face and gently tap masque to remove air bubbles. Allow 10-25 minutes for the masque to activate and then gently remove from skin. Lightly massage any remaining product into face, neck and décolleté. Follow with your favourite moisturiser.

Will I see results immediately?

Results will vary for each individual based on their skin. Lumière de Vie Moisture Intense Sheet Masque is formulated to refresh dry, aged skin, and add hydration back into to the skin for a younger, smoother-looking appearance.

When should I use the Masque?

We recommend using this masque at night because the concentrated formula will leave a replenishing treatment on the skin that is to be massaged in. Leaving on overnight will maximise the hydrating benefits of the masque. In the morning you can cleanse skin as part of your daily routine.

Will my skin feel a tingling sensation while wearing the masque?

Some individuals may experience a tingling sensation due to the intense nature of the masque. This is expected and should subside once the masque is removed and the remaining treatment is massaged into the skin. If you do experience any skin irritation, discontinue use and contact a physician.
