GLOSS, STREAK-FREE SHINE,
WITHOUT ANY WHITE
RESIDUE

PRODUCT SKU: 6533 | 16 FL. OZ.

Why Choose Autoworks Shimmering Polish?

Protect your car from the elements with Autoworks Shimmering Polish, a unique auto polish containing optical brighteners that maximize the paint's brilliance and shine. Every day, road dust, tar, pollen and assorted environmental debris take their toll on your car's finish, leaving behind unsightly residue and minute amounts of damage that are often invisible to the naked eye. Apply Autoworks' car polisher in combination with Autoworks Shimmering Polish to keep your car looking great, no matter what the elements have in store.

Autoworks car polishers contain Timeron mica, a common cosmetic component that refracts light to provide a radiant, shimmering shine. This environmentally friendly product is non-toxic and biodegradable and uses plant-based ingredients that are free of paraben preservatives and phosphates. Bottled in recyclable plastic, it contains no harsh chemicals or abrasives and resists detergents, pollution, hard water spotting, road salts, insect remains and bird droppings. Perfect even if you don't know how to polish a car.
