

# AUTOWORKS™ FUEL ENHANCER

PROTECTS ENGINE LIFE

SAFE FOR GASOLINE AND  
DIESEL ENGINES

HELPS LOWER EMISSIONS

PRODUCT SKU: 6538 | 8 OZ.

## Why Choose Autoworks™ Fuel Enhancer?

Most fuel treatments either boost octane levels or clean one portion of the fuel system, both of which provide less than a one percent increase in gas mileage. Autoworks™ Fuel Enhancer can improve gas mileage and has additional benefits, including a clean fuel system, a longer engine life, improved performance, and lower emissions and reduced overall oil consumption.

Autoworks Fuel Enhancer is more than just a fuel injector cleaner or octane booster — it's a multifaceted approach to fuel treatment — cleaning fuel injectors, carburetors, intake valves and ports, and cleaning sulfur deposits from gas gauge sensors. Autoworks Fuel Enhancer boosts power and performance, helps relieve cold start problems, helps protect against fuel system sulfur deposits, helps protect gas gauge sensors from malfunctioning, and helps reduce deposit-related engine knocking and pinging.
