ANTI-AGING NUTRACEUTICALS

AIDS IN IMPROVING AND  
ENHANCING MEMORY

HELPS MINIMIZE THE EFFECTS  
OF AGING ON THE BRAIN

HELPS MAINTAIN NORMAL  
BRAIN PHYSIOLOGY

PRODUCT SKU: 13095 | 30 SERVINGS

## Why Choose Prime Cognitin Memory Support Formula?

As we age, the ability to retain our memories sometimes fades. At times, even the simplest things - names, events or tasks that we would have had no problem remembering a few years ago - seem to completely slip our minds. Instead of turning to supplements for memory and focus or brain supplements with lesser formulas and higher prices, turn to Prime Cognitin to support your overall cognitive performance.

In the market of supplements for memory and focus, Prime Cognitin stands out. Prime Cognitin is specially designed to help maintain healthy blood circulation within the brain. Maintaining proper blood flow to the brain is important in maintaining proper brain function - a job competing brain supplements don't address.

Prime Cognitin's ingredient combination is unique to supplements for brain health, utilizing a combination of alpha-lipoic acid, ginkgo biloba and acetyl l-carnitine to support normal brain activity by maintaining healthy blood circulation in the brain and infusing the brain with antioxidants to inhibit free radical activity, which can lead to premature aging on a cellular level and affect the brain.

## What mechanisms does this formulation work by\*?

- Aids in improving and enhancing memory
- Supports normal mental activity
- Inhibits oxidative stress on the brain
- Helps maintain healthy blood circulation within the brain (cerebral blood flow)
- Helps maintain normal brain physiology
- Supports overall cognitive performance
- Promotes healthy levels of acetylcholine (an important neurotransmitter in the brain)
- Helps minimize the effects of aging on the brain

## When should I start to see a difference?

Possibly within two weeks.
