BENEFITS

FAQ'S

BENEFITS

- SymPeptides™ (Myristoyl Hexapeptide-16, Myristoyl Pentapeptide-17 and Myristoyl Pentapeptide-8) increase visible volume of lashes and brows by 25% in just 14 days for fast, dramatic results
- Hydrolyzed glucosaminoglycans promotes healthy, long lashes

FAQ'S

How do I use Fixx™ Lash Extend? Ensure face is clean and makeup free. Apply daily at bedtime after other facial products. Prime product by twisting end of click pen until brush applicator is saturated. Trace the brush applicator along the base of your lashes on your closed upper lid (where the eyelashes meet the skin). Trace from inner to outer lash line. Do not apply in the eye or to the lower lash line.

Why should I use a lash extend serum? Long, thick lashes enhance the shape of your eye, which is a feature people notice upon first impressions. A lash extend serum is a safe and inexpensive tool to achieve naturally longer-looking eyelashes. The serum, applied nightly, nourishes and fortifies your lashes easily.

Are there any side effects to the use of this product? Fixx™ Lash Extend's high performance formula contains safe and effective ingredients that are compatible with the natural makeup of your skin. This product is 100 percent bimatoprost free. It has not been known to produce any side effects.

When should I see results? Fixx Lash Extend serum helps to increase the look of volume of lashes and brows in just 14 days. To maintain results, use this product daily.

What do I do if I get Fixx™ Lash Extend in my eye? If product enters eye and causes irritation flush thoroughly with water. Consult a physician if irritation persists.
