How is this different from other cleaning products?

Our cutting edge formulas and innovative packaging are leading the way to the future of cleaning. All you have to do is drop a concentrated pack into its matching, pre-labeled bottle and add water! In one minute the pack will dissolve; just give it a shake to disperse and mix the solution. No mixing, no mess!

Do I need to tear open the liquid pack to use it?

No. DO NOT cut or tear open the pack. The pack dissolves in water.

Does the bottle need to be empty before using another pack?

For best results, use the complete contents of the bottle before dropping another pack in. The concentrate is formulated to mix with the specified amount of water. Rinse the bottle with fresh water before using the next pack.

Is this a good product to use around pets and children?

Yes, when used according to the label directions. Keep out of reach of children and pets. Harmful if swallowed. Do not put in mouth or ingest. Causes eye irritation. Do not get in eyes. Always wash hands after handling. Store in a cool, dry place. Never handle packs with wet hands. Always close container after use.

Why don't the bottles come with the refill packs?

The refill packs are designed to be used in conjunction with the Snap Essentials Kit. Once you have purchased a Snap Essentials Kit, you can reuse the bottles in the kit. Our bottles and sprayers are heavy duty, top of the line quality and are made to last a long time. You will not need a new set of bottles every time you order a Snap Essentials refill pack.
