Can Essential Oils by Royal Spa® be used aromatically and topically?

Yes! To use aromatically, fill an oil diffuser as directed with water, add 3-4 drops of your Essential Oils by Royal Spa, and breathe in as the mist fills the room.

To use topically, simply apply 1-2 drops on your hands or flex points (feet, hands or wrists). Dilute as needed with a carrier oil (i.e. coconut, olive, almond, or grapeseed), depending on skin sensitivity. It is recommended that you test a small area of the skin before use in case of allergies.

What is the grade/quality of the oils used in the Essential Oils by Royal Spa®?

Our blends are made up of both Pure and Commercial Grade essential oils. Essential Oils undergo a testing process for color, fragrance, density, refractive index and Gas Chromatography/Mass Spectrometry analysis before and after they are blended. All Essential Oils blends are natural and contain no synthetics (including phthalates).

Also, it's all about the source. The essential oils found in our blends are cultivated by farmers from over 30 countries around the world with the best climate and soil. All farmers are qualified based on source specifications, standards and compliance.
