## JOINT SUPPORT FORMULA BY ISOTONIX

As the body ages, many people experience joint discomfort. Prime Joint Support Formula by Isotonix™ contains the powerful antioxidant Pycnogenol®,<sup>†</sup> which inhibits the body's overactive inflammatory processes associated with the normal aging process. By taking Prime Joint Support Formula, you can contribute positively to maintaining healthy cartilage and healthy joints. Prime Joint Support Formula is the only product on the market that delivers needed glucosamine and Pycnogenol in an isotonic form. The suspension's isotonic state allows nutrients to pass directly into the small intestine and absorb rapidly into the bloodstream. With Isotonix products, little nutritive value is lost, making the absorption of nutrients highly efficient while delivering maximum results.

- Jamieson Glucosamine Chondroitin MSM\*

### WHY PRIME JOINT SUPPORT FORMULA BY ISOTONIX IS BETTER

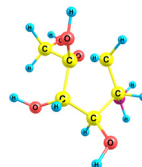

Contains Pycnogenol, which research has shown inhibits inflammation associated with the normal aging process.

Does not contain MSM or chondroitin. Chondroitin has poor absorption due to its high molecular weight and is backed by inconclusive research. Research on MSM is also inconclusive, and it takes large quantities (2–6 grams daily) for effects to become noticeable.

The only product on the market to deliver Pycnogenol and glucosamine in isotonic form. Market America is the exclusive provider worldwide of isotonic-capable Pycnogenol.

When looking at a joint supplement, there is one ingredient found in most products on the market: glucosamine. The research behind glucosamine is consistent: Its benefits are effective, it's naturally produced by the body and it's a key component of cartilage.
